

Life made seamless.

VOLARE BROCHURE

> SEAMLESS PERFORMANCE

Multi-level living that feels effortless.

Introducing an elevator into your home shouldn't feel complex or overwhelming. At Next Level Elevators, we combine refined Italian design with precision all-electric engineering to create a lift experience that feels calm, considered and seamlessly integrated. For more than a decade, we've partnered exclusively with Eltec of Italy to deliver beautifully resolved solutions for Australian homes - removing unnecessary complexity so you can move through your space with confidence, clarity and ease. Backed by a 7 year warranty*.

Join us as we continue to redefine the elevator industry in Australia.

Why choose Next Level Elevators?

ADVANCED ENGINEERING

Precision-engineered all-electric elevators designed with contemporary European innovation at their core.

CERTIFIED SAFETY

Designed and tested to meet Australia's strictest safety standards for complete peace of mind.

Homes made exceptional.

QUICK INSTALLATION

A streamlined installation process designed to minimise disruption and keep your project moving.

AWARD-WINNING EXPERIENCE

An award-winning team trusted across Australia for premium residential lift installations.

ALL-ELECTRIC EFFICIENCY

Fully electric operation delivers energy-efficient performance with lower running costs and reduced environmental impact.

END-TO-END SERVICE

From manufacturing through to installation and ongoing maintenance, we manage the entire lift journey.

Volare

Affordable luxury.
Seamless by design.

The Volare brings premium Italian engineering within reach. Designed for contemporary Australian homes, it combines advanced all-electric technology with a streamlined footprint - making it one of the most practical residential lifts to install in the market.

Available in one carefully considered standard size, Volare's minimalist design complements a wide range of interior styles, so it blends effortlessly into any home.

PIT DEPTH	150 mm
HEADROOM	2400 mm
ELECTRONICS CABINET	Control box: 256w x 168d x 1982h mm
POWER	Single phase / 230 V 10 A

EXCLUSIVE SMART*Shaft*™

The clever, more cost-effective way to build your elevator.

This innovative, self-supporting shaft system offers an optional alternative to a traditionally built shaft, simplifying construction while preserving architectural integrity. Ideal for both new builds and retrofits, SmartShaft™ delivers a cleaner, more efficient path to installation.

CUSTOMISE YOUR CABIN INTERIOR

Select from a considered range of doors, wall panels, flooring and accessories, in standard or premium finishes to suit your home.

AFFORDABLE INTEGRATION

The SmartShaft™ structure delivers exceptional value rarely seen in the residential elevator market.

CONFIGURABLE DESIGN

Choose from single or through-car entry configurations to suit your floorplan requirements, allowing greater flexibility across new builds and retrofits.

SITE ADAPTABLE

An intelligent fixing system enables the shaft to integrate cleanly with surrounding structures on site.

FLEXIBLE FINISHES

Designed to be beautifully clad in timber, plasterboard or custom materials, allowing the shaft to integrate seamlessly with your home's architectural vision.

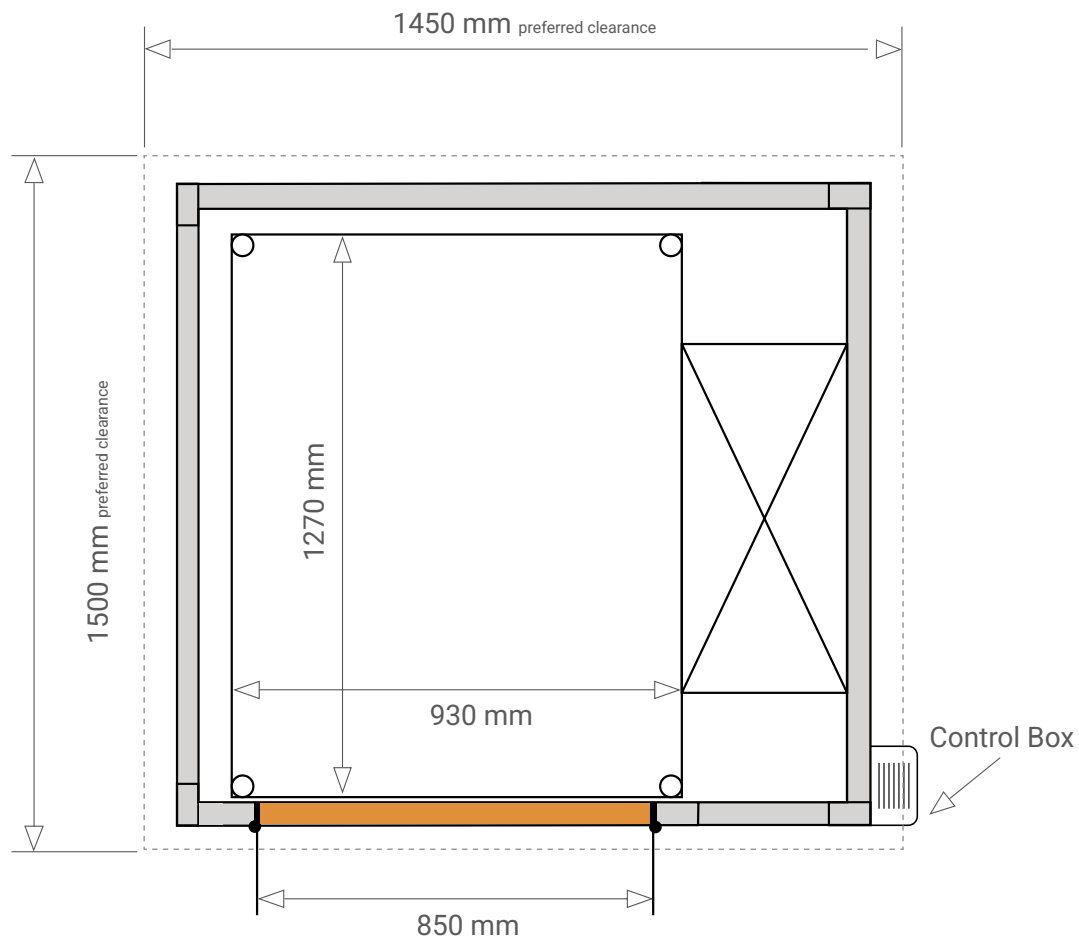

MODULAR INSTALLATION

A precision-engineered modular system that can be installed in a single day, with components sized to pass through standard door openings - eliminating the need for heavy lifting equipment.

Single Entrance

SMART*Shaft*[™]

The following specification details are for the Eltec Volare that features a swing door with a single entrance configuration in a SMARTShaft[™]. These specifications are provided as a general guide only and should not be used for construction.

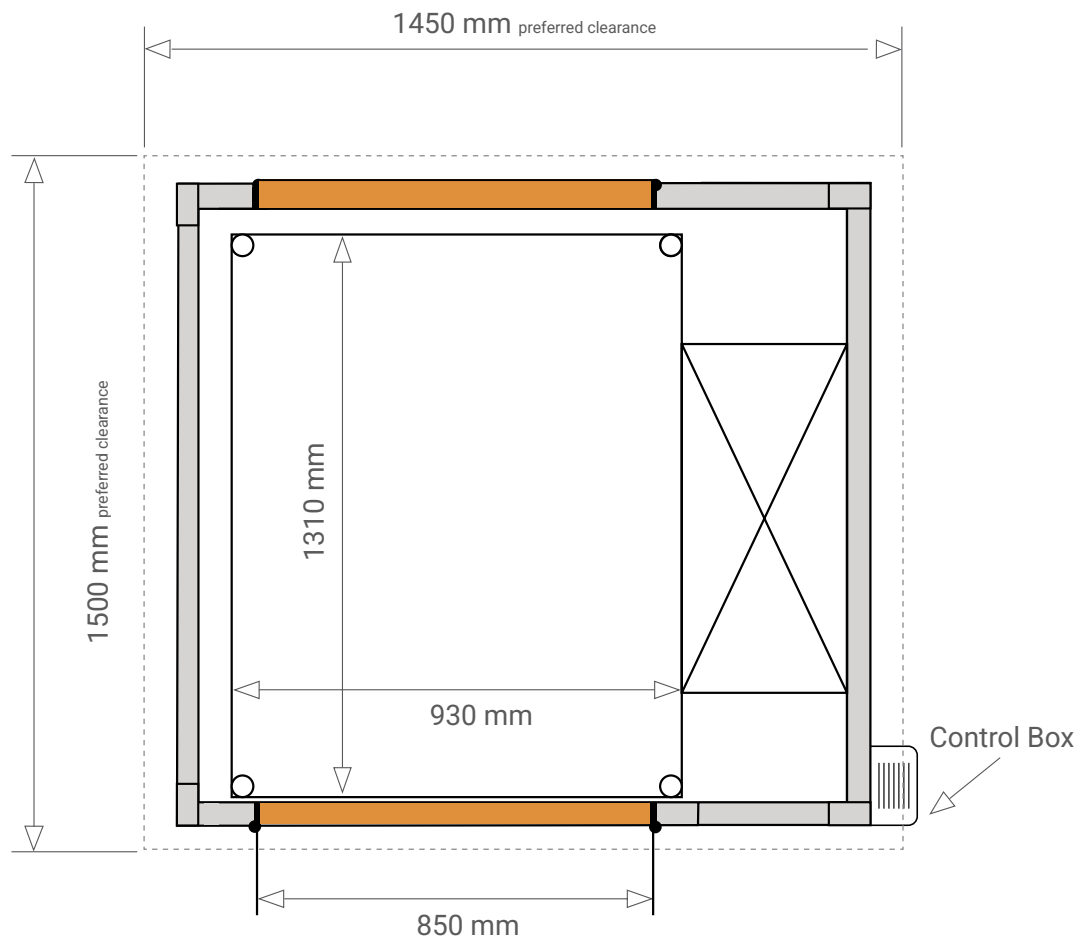

Control Box: 256mm (W) x 168mm (D) x 1982mm (H)

Controller is not fixed to its position and can be located on any shaft wall on either level

Through Car SMART*Shaft*[™]

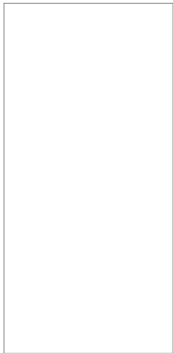

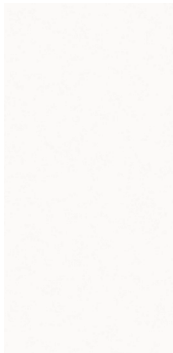

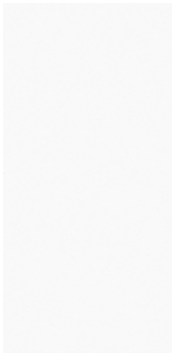

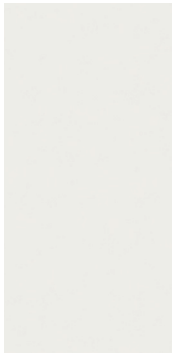

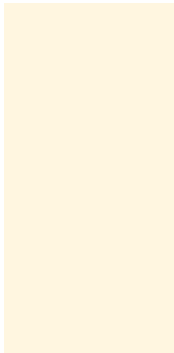

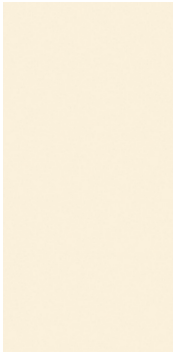

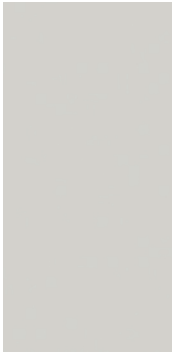

The following specification details are for the Eltec Volare that features a swing door with a through car configuration in a SMARTShaft[™]. These specifications are provided as a general guide only and should not be used for construction.

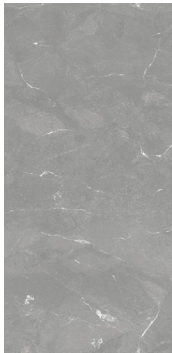

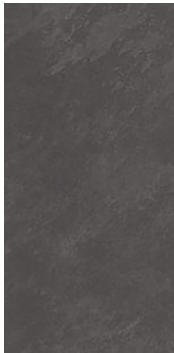

Controller is not fixed to its position and can be located on any shaft wall on either level
